

PUKHRAJ GARASIYA

Indore, Madhya Pradesh, India

+91-7828803429 pukharajgarasiya@gmail.com LinkedIn Portfolio

Summary

- Data Scientist with a B.Tech in AI and Data Science. Proficient in Python, SQL, and Machine Learning, specializing in statistical modeling, predictive analytics, and data visualization to drive scalable, data-driven solutions.

Education

- **Rajiv Gandhi Proudhyogiki Vishwavidyalaya** **2021 – 2025**
B.Tech - Artificial Intelligence and Data Science *Indore, Madhya Pradesh*
- **Saraswati Vidya Mandir** **2020 – 2021**
12th - Science + Mathematic *Neemuch, Madhya Pradesh*
- **Dashpur Vidya Mandir** **2018 – 2019**
10th *Mandsaur, Madhya Pradesh*

Work Experience

- **AI/ML Intern** **July 2024 - August 2024**
ListApp Pharmatech Pvt. Ltd. *Indore, Onsite*
- Developed an OCR and NER-based invoice recognition system, enhancing data accuracy by 20% and efficiency by 30%.
- Collaborated with engineers to optimize code, reducing runtime by 25% and completing 15+ code reviews.
- **Data Engineer Intern** **April 2024 - September 2024**
SC United Intern SL *Online*
- Developed and managed a centralized database for student academic records using SQL, improving data organization and accessibility, while optimizing query structures to enhance performance and reduce retrieval time by 25%.
- Designed automated SQL queries to generate dynamic reports, reducing manual effort by 40%.

Projects

- **Sentiment Analysis of Social Media** **GitHub**
Python, Pandas, NumPy, Matplotlib, NLTK, VADER, Seaborn, Streamlit
- Conducted sentiment analysis on social media data using NLP techniques (NLTK, VADER, and SpaCy), achieving 85% accuracy in sentiment classification and preprocessing 10,000+ social media posts by removing noise, tokenizing.
- Developed a Streamlit dashboard to visualize sentiment trends and allow real-time sentiment analysis by users.
- **Pepper Ball Disease Classification** **GitHub**
Python, TensorFlow, Keras, Matplotlib, Flask, HTML, CSS, JavaScript
- Developed a TensorFlow model for pepper ball disease classification with 90% accuracy using a dataset of 500+ images.
- Integrated the model into a Flask web app, enabling real-time image uploads for accurate disease detection.
- **Movie Recommendation System** **GitHub**
Python, Pandas, NumPy, Scikit-Learn, AST
- Designed a collaborative filtering system, boosting engagement by 30% and accuracy by 15% using 10,000+ ratings.
- Optimized similarity metrics, reducing model error (MSE) by 20% using Scikit-Learn.

Technical Skills

- **Programming Languages:** Python, SQL
- **Data Science Techniques:** Machine Learning, Deep Learning, Natural Language Processing
- **Data Visualization & BI:** Power BI, Excel, Matplotlib, Seaborn
- **Databases:** MySQL, MongoDB
- **Big Data Frameworks:** PySpark
- **Soft Skills:** Problem Solving, Team Collaboration, Communication, Self-Learning

Certificates

- Career Essentials in Data Analysis by Microsoft and LinkedIn
- Introduction to Data Analytics by Simplilearn and SkillUp

Achievements

- Participated in the Project Competition during the Annual Technical Festival 'Utsav 2K24' at PIEMR, Indore
- Participated in the Inter college Kabaddi Competition
